Forecast for Thursday 18 Aug 2022

Weather: Cloudy with a few clear spells during the early hours of Thursday morning, however cloud will increase robustly from early morning. Outbreaks of rain should reach Snowdonia from late morning, with some heavier and potentially thundery bursts possible throughout the afternoon. The rain will become lighter during the evening before clearing near midnight.

Chance of cloud-free hill tops above 800m: 70% reducing to 10% from mid-morning.

Low Cloud and visibility: Visibilities generally good initially with cloud bases mostly above the level of the summits. However cloud banks will be present on some windward slopes with bases from 500m. Cloud bases will drop towards 400-600m from mid-morning, as rain bearing cloud arrives. Visibilities also reducing generally, becoming very poor in heavy rain.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Conditions will deteriorate during the morning as rain bearing cloud arrives from the north and west. Cloud bases initially above summits will soon drop, reducing visibilities and making navigation challenging at best. Together with outbreaks of rain, locally heavy and thundery, conditions will be very difficult at times.

Forecast for Friday 19 Aug 2022

Weather: A dry and bright start with mostly clear skies across Snowdonia Friday morning, cloud bubbling up during the late morning and early afternoon. Decent sunny spells into the afternoon and evening.

Maximum wind: Westerly 15-20 mph with isolated gusts of 25-30mph.

Chance of cloud-free hill tops above 800m: 75% chance throughout.

Low Cloud and visibility: Visibilities generally very good with isolated shreds of cloud with bases well above mountain tops.

Temperature: **Valleys:** Plus 9 Celsius, becoming plus 23 Celsius.
At 800m: Plus 7 Celsius, becoming plus 18 Celsius.
Freezing level: Above the level of summits.
